Front End Developer

Description

Here at Weed Class, we produce content for our readers, pertaining to cannabis products, the laws surrounding their use, and the growing cannabis industry. It is important that we provide our readers with an appealing user experience, easy navigation, and fast performance.

A front end developer for Weed Class is responsible for making updates, fixes, and optimizations to the features and UI/UX of the website. We are always adapting to new plugins and technologies available to us, as well as the ever-changing Search Engine Optimization landscape. These updates and improvements are collectively aimed at helping our readers find our content and consume it. A front end developer for Weed Class should be highly proficient in WordPress development and should be able to complete projects with limited additional guidance.

Responsibilities

- Implement upgrades to the site
- Repair broken features, should the need arise
- Assist our publishers in their technical/formatting needs
- Keep the site up to date with new plugin/software versions

Qualifications

- 5+ years of experience with WordPress development
- HTML5/CSS3
- Flexbox/CSSGrid
- Highly proficient in current SEO best practices
